EXCEPT WHERE PROHIBITED BY APPLICABLE LAW, NO CLAIM, REGARDLESS OF FORM, ARISING OUT OF OR IN CONNECTION WITH THIS AGREEMENT MAY BE BROUGHT BY LESSEE MORE THAN TWO (2) YEARS AFTER THE EVENT GIVING RISE TO THE CAUSE OF ACTION HAS OCCURRED.

- 22.3 Any Upgrades furnished hereunder shall be governed by the software license agreement contained herein. Upgrades are shipped upon Lessee request.
- 22.4 Customer Response System. Except for J5 Products (defined below), Lessor provides primary access to maintenance and support via Lessor's Customer Response System ("CRS"). CRS is a web-based system that allows customers the ability to submit Service Requests (SR), perform web queries, and obtain the status of an SR anywhere in the world, 24 x 7.

General CRS procedures:

1. Service Cases: Lessee logs a Case via CRS or calls into Support giving a description of the problem. Lessee receives a Case number for the request filed.
2. Case Priority: Lessee responses to CRS system describing the Case are used to set priority of the Case into one of four priorities: 1-Critical, 2-High, 3-Medium, and 4-Low.

1-Critical: The entire production system is completely inoperable. No users can access and/or utilize the production system. There is no possible workaround.

2 – High: Multiple users are unable to access and/or utilize the production system, a primary function is completely inoperable or not working as documented, or application performance is degraded such that production operations are effectively blocked. There is no possible workaround.

3 – Medium: Single user unable to launch applications or requires assistance with login, password or account lockout. Primary function is not working as documented but has a workaround. Secondary function is not working. Lessee requests a change to software function.

4 – Low: User request for clarification or minor issue/request. Request for change to environment.

3. Case Assignment and Resolution: When Lessee submits the Case to CRS it triggers a notification to be sent immediately to a Lessor support manager. The support manager will assign the Case to a support agent and support agent is notified that Lessee has submitted a new Case. The support agent will collaborate with Lessee to determine a resolution to the Case. If Lessor determines that the resolution of the Case requires a correction to the Software Product, the issue will be recorded with a priority state in the development requirement database.
 4. Status of Case: Lessee may check the status of a Case via CRS at any time.
 5. Web Queries: Lessee may obtain information on known problems and available fixes and workarounds via CRS.
 6. Product Change Request: Lessee may request product Change Requests for consideration by Lessor via CRS.
- 22.5 Satisfaction and Escalation Procedure. CRS provides a Customer Satisfaction Survey that Lessee may use to provide ratings regarding its satisfaction as to the level of service. Should Lessee be dissatisfied as to the level of service it is receiving in the resolution of an SR, Lessee will be contacted by a member of Lessor's Support Management to discuss a resolution.
- 22.6 Excluded Software Services. Services for the following are outside the scope of this Agreement and may be available under separate agreement at an additional charge (collectively "Excluded Services"):
- e) System installation (hardware/software platforms)
 - f) Network configuration support for third party products not sold to the Lessee by Lessor
 - g) System-level tuning and optimization
 - h) Programming development
 - i) Customization and configuration

- 22.7 Lessor may perform the Maintenance hereunder either through its own affiliates', subsidiaries' or distributor's personnel.

All service requests from remote users shall be logged from the location where the application server or portal server license is located.
